

Financial And Business Consultation

The Financial and Business Consultation Department, over the past few years, has been involved in tens of capital and stock raising processes. A special team to accompany each transaction is comprised of experts in economics and business as well as professionals in the area of taxes and bookkeeping, all of whom provide a full package of services for the client

Below are services the department offers:

- Help in raising capital and merges - purchasing and selling of enterprises, locating and representation before investors, accompanying negotiations, value estimations, planning taxes and legal aspects, reporting and representation in front of the Tax Authorities.
- Preparation of business plans - planning and ongoing assistance in implementation of the program.
- Evaluating the worth of companies for purchase and selling and/or admittance or exit of a partner.
- Performing a Due Diligence examination on financial and business levels prior to purchase activities, including a comprehensive research on the firm.
- Ensuring that appropriate international standards are met, budgeting surplus, cost and employee options.
- Banking and financial accompaniment – representing and carrying out financial arrangements with the financial and banking systems, providing financial solutions to the enterprises.
- Performing an examination of financial profitability including pre development of the project.

Below are a number of companies we have helped to raise capital (including indications of profit, planning and tax representation, organizing relationships with the owners and help with negotiations with investors/ underwriters).
